

The Cincinnati Woodworker

Dedicated to Sharing Woodworking Knowledge

2013-2014 Meeting Schedule

September 14, 2013-NW

November 9, 2013-SW

January 11, 2014-C

March 8, 2014-SE

May 10, 2014-Lunch-NE

Meeting Location

Northminster Presbyterian Church, 703 Compton Road—approximately .2 miles east of Winton Road.

The meetings are held in the Disciples Hall, located in the basement. Park behind the church, and enter through the double doors on the right side of the building, in the back.

Meeting Time

Our room opens at 8:30 AM. The meeting is from 9:00 AM to 12:30 PM. Please plan to arrive on time and stay for the entire meeting.

Refreshments

Donuts will be available at the meeting. Please bring your own coffee in a cup with a lid. Please clean up your spills

Decorative Effects for Woodworking and Demonstration of a CNC Router Machine

The CWC Southeast Group has the following program for the March 8 meeting.

CWC member Gene Bartholomew will give a presentation on Decorative Effects for Woodworking. Gene has several topics he will share with us.

- Examples and sources for metal inlays, both string inlay and metal tiles.
- A novel geometric decorative effect for panels and vertical surfaces using a router with various bits
- A different method of decorating panels using metallized, painted, or metallic panels (laminates), with sample pieces and sources
- Some uses of engineered flooring in woodworking and furniture construction.

Eric Dunn and Dennis Reed from Rockler will demonstrate the CNC (Computer Numerically Controlled) Shark router machine.

GUESTS

Guests and prospective members are always welcome at CWC meetings. If you know someone who is a woodworker or wants to learn, please invite them to join us.

VIDEO LIBRARY

Don't forget about the Club's video library. Rental fee is only \$1.00. There is a deposit of \$10.00, that is returned to you when the video is returned. Club member Manuel Canales maintains the video library

AUCTION SUCCESS

Thanks to all who donated and bought auction items. We netted \$530 for the club's charity projects. The proceeds will be used to buy materials for toys, boxes, beds, etc.

Ray Jang shared the Greene and Greene style jewelry cabinet he built

Howard Renner built this oval side table

MEMBERSHIP DUES

Your CWC dues are a great value

Member dues are payable each September

New members may join at any time.

Annual Dues:	Adults	\$15.00
	Student	\$5.00

To join or renew, fill out the Membership Application form and, with your payment, mail it or bring it to the next meeting. You may also complete the application online on the club web site.

<http://CINCINNATIWOODWORKINGCLUB.ORG/AboutUs/Membership.aspx>

CWC is open to woodworkers of all skill levels, without regard to sex, race, religion, national origin, age or handicap.

This circular tray with line and berry inlay was built by Paul Sanow

Bill Dean shares information about Shaker Village, located near Harrison, Ohio.

Keith Mealy has posted a link to a video on how to make the snowflake / star ornaments on the club web site (under Forums).

MARCH SEMINAR

**MARCH 29, 2014, 9AM
KEITH NEER'S SHOP, WILLIAMSBURG, OHIO
4120 Tollgate Rd., Williamsburg, Ohio
\$25.00 (INCLUDES LUNCH)
LIMITED TO 40 ATTENDEES**

Epoxy Surface Treatments: Decorative, Durable, and Diverse with Mark Hedin

Set your work apart and diverge from the norm. This one day seminar will explore the use of epoxy as a unique decorative finish and as a basis for numerous forms of embellishment, as well as structural applications. Epoxy has long been used by woodworkers as an adhesive and utilitarian protective coating, but as a whole it has a relatively unexplored and very diverse array of applications for woodworkers.

From the finish on fine furniture to translucent stained glass-like panels, from colored metal inlay to casting your own turning blanks, from decorative furniture components to vacuum infusion/stabilization, epoxy can add incredible depth and character to any project. Mark will discuss and demonstrate a variety of techniques for utilizing this unique medium to create stunning one of a kind result. Expand your repertoire of skills and learn what epoxy can do for you.

Key points:

- Epoxy as a medium: understanding material choice and resources
- Safety and construction considerations
- Decorative details utilizing epoxy
- Epoxy as a finish: surface infusion vs. film finish
- Incorporating color and inclusions to embellish your work
- Vacuum Stabilization/plasticization and its structural implications
- Dyeing and double dyeing vacuum infused materials
- Unique structural applications for epoxy
- Casting blanks for turning or flat work
- Techniques, tools, and equipment used to mill/machine epoxy and resin infused materials

This is the same class Mark teaches at Marc Adams' School of Woodworking, further away and costing close to \$200:

SEMINAR REGISTRATION FORM

Cincinnati Woodworking Club Spring 2014 Seminar Registration

Name _____

E-Mail Address: _____

Phone Number(s): _____

Bring check payable to CWC for \$25 to March meeting or mail to:

Dick Fisher

7422 Silver Creek Rd.

Cleves, Ohio 45002

Registration and payment in advance required. Limit 40 attendees.

The Jim Schaefer Toy Project - Needs for 2014

Jenny King, (from Christian Appalachian Project (CAP)), John Leonardi, Terry Elfers, George Murphy, and Larry Saupe discussed CAP's needs and wishes during a conference call on January 6, 2014. The call helped us determine the needs of the organization. Please consider these requests as you plan your 2014 toy building.

Larger items are more popular. Examples include:

- Car carriers (we have information on our website for making a jig) , police cars, dump trucks, fire trucks, airplane, helicopters, farm and farm animals, blocks, puzzles
- Tool carriers
- Need more items for girls. They liked the cradles we did this past year, and would like more of those. Purchased items, such as make up items, hair products, are also appreciated.
- Step stools
- Birdhouses for wrens and bluebirds
- They are always in need of furniture - used furniture is acceptable.

We do have a supply of wheels. If you would like some for our charitable projects, please send an email to John Leonardi (jleonardi@zoomtown.com) with your needs. He will bring them to the March meeting.

Christian Appalachian Project – Ten Under-Bed Storage Boxes

CAP has a special request this year. They would like cubbies and/or under the bed storage boxes. They will use these at the summer camp they run for the children. We have decided that the under the bed storage boxes would be the most economical for us to make and transport, and would like to make 10 of them this spring.

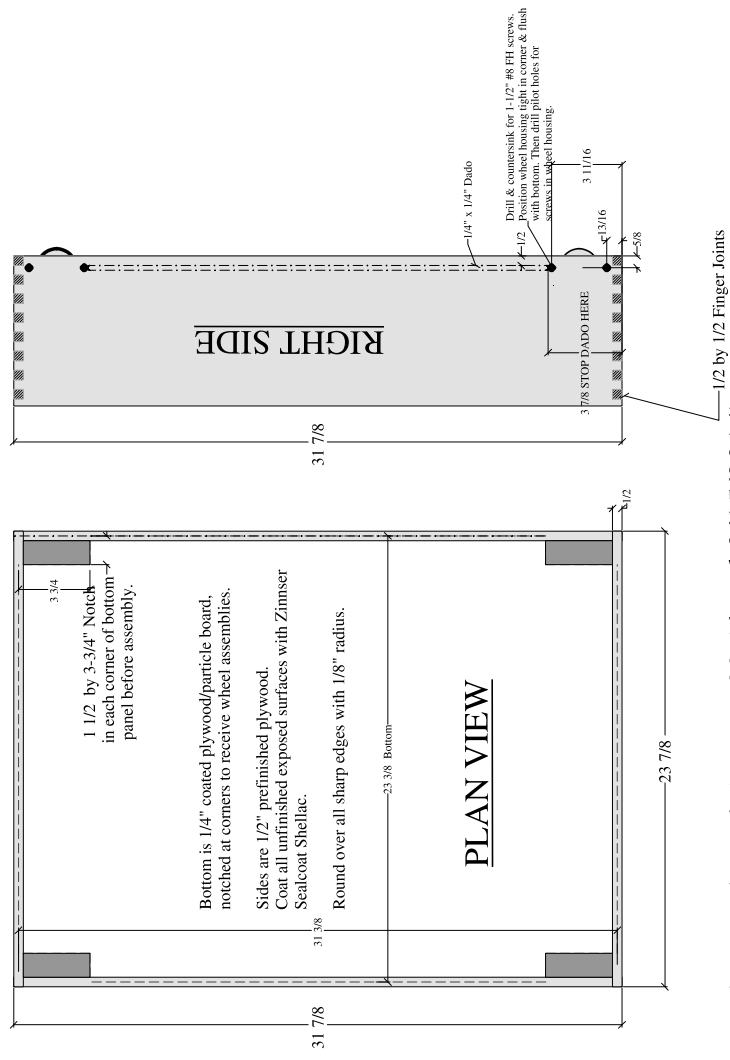

George Murphy has drawn up a plan of what we are going to make, and has outlined the steps required to make the drawers. Please contact George Murphy murphyhg@fuse.net if you can help with any of these needs. He has detailed drawings.

Need #1- Acquire one piece of 1" thick and one piece ¾" thick hardwood and make 40 wheel housing sub-assemblies (per drawing) that are 3-1/2" wide by 2" high. This will require a drill press. Acquire and cut ¾" diameter by 1-1/4" long steel rod for axles. Complete sub-assembly with club-provided wooden wheels.

Need #2– Someone with a vehicle that can haul four 4' by 8' sheets of pre-finished plywood and assist in delivering them directly for ripping on the table saw. Cross cut them into 20 sides, 20 front/back and 10 bottom panels. Cut notches in bottom panel corners that receive wheel subassemblies. Cut thru-dados in front/back panels and stopped dados in side panels. Round over edges. Drill wheel assembly attachment holes in side panels.

Need #3 - Accurately cut ½" finger joints on the 40 panels that make up the 7-7/8" high side and front panels. Glue and assemble boxes and wheels. Apply finish to finger joints and sawn edges. Provide the space and store boxes until delivery.

Need #4- Deliver to Mt. Vernon.

Under-Bunk Bed Storage 02 (dated 2/15/2014)
