Printing Instructions for Car Carrier Drawings

- A full-size drawing of the car carrier toy can be assembled from *Car Carrier Full Size Drawing Page 1.pdf* and *Car Carrier Full Size Drawing Page 2.pdf.* It's a little tricky to get the printed output size correct and may require some trial and error depending on your printer.
- Using Adobe Acrobat Reader, set Page Scaling to "Fit to Printable Area". Then in your printer properties select "borderless" as if you are printing a borderless photo.
- Print Page 1. (for a quick test of scale, check the width of template to ensure it is 4 ½")
- Print page 2 following same setup.

With scissors, trim white border to printed lines on right hand side of page 1.

Line up right hand side of page one with left hand side of page 2 and tape in place with transparent tape. Behold the full-size drawing.

Note: if you decide to make several of the car carriers, see George's instructions for building a template.

Thanks to George Murphy for creating the drawing.
